

Statistics about bullying of students of color

- 25% of African-American students, 22% of Caucasian students, 17% of Hispanic students, and 9% of Asian students report being bullied at school ([National Center for Educational Statistics, 2016](#)).
- More than one third of adolescents reporting bullying report bias-based school bullying ([Russell, Sinclair, Poteat, & Koenig, 2012](#)).
- Bias-based bullying is more strongly associated with compromised health than general bullying ([Russell, Sinclair, Poteat, & Koenig, 2012](#)).
- Race-related bullying is significantly associated with negative emotional and physical health effects ([Rosenthal et al, 2013](#)).
